

JAO: Jeets Are Out

Official White Paper

Project by Meme Street Development

1. Executive Summary

JAO (Jeets Are Out) is a Solana-based meme coin launched by **Meme Street Development** to celebrate diamond hands, expose paper-handed jeets, and reward holders who stay true. Backed by a seasoned dev team, JAO isn't just another token drop—it's a movement powered by community culture, memetic dominance, and built-in utility.

2. The Vision

Jeets are the problem. We are the solution.
JAO flips the script on weak hands with:

- A culture-driven anti-jeet economy
- Holder rewards that pay out over time
- A Web3 software suite (coming Phase 2)
- A meme-native brand with real influence

3. Tokenomics

- **Total Supply:** 1,000,000,000 JAO
- **Initial Liquidity:** Locked at launch via smart contract
- **LP Platform:** Raydium v4
- **Buy/Sell Tax:** 0% (Fair Launch)

Key Notes:

- There is **no presale**. This is a **fair drop**.
- A portion of LP will be **burned on launch**.

- The remaining token supply is **vested in lock contracts**, publicly viewable.
- All LP will eventually be **fully burned**.
- **Dev wallets are transparent** and verifiable.

4. Utility

On drop, JAO includes native utility:

- **Dividend Rewards:** Trade fee dividends distributed hourly to holders who **stake** their tokens
- **Additional blockchain features** are planned for future phases, expanding the JAO ecosystem with new DeFi functionality

5. Anti-Jeet Mechanisms

- Meme shame culture: We clown paper hands
- LP reserves for dip support
- Smart buys to counter dumps
- Hourly dividend rewards for stakers
- Strategic sniper protections on launch

6. Team

- **The Wolf** — Founder & Lead Dev
Operates under the **Meme Street Development** banner. Known for structured fair launches, transparent vesting, and consistent meme coin growth mechanics.
- Additional team members include marketing, mods, community leads, and utility devs (to be revealed post-launch).

7. Community First

From early **Telegram raids** to meme contests and daily **X Spaces**, JAO is built around its holders. We let the community:

- Influence meme drops
- Vote on roadmap pivots

- Run raids, contests, and content

8. Disclaimers

JAO is a **meme coin**, not a financial instrument. While utilities are being built, no guarantees are implied. Always DYOR. This project exists to flip charts and flip jeets—not your mortgage.

Roadmap

Phase 0: Pre-Launch

- Set up Telegram and build the early JAO community
- Daily live **Spaces on X** hosted by the team
- Active raid squads organized through Telegram
- General manager + social media team running operations
- Begin rollout of **animated video series**

Phase 1: Launch

- Token drops via **Raydium v4** (fair launch)
- LP paired and partially **burned**
- Remaining tokens **locked and vested**
- Launch **staking + dividend system** on day one
- Anti-sniper protections implemented
- Begin trending push on **Dexscreener**

Phase 2: Growth & Utility

- Release **Web3 software suite** including:
 - A new **decentralized exchange (DEX)**

- A **decentralized market protocol** (details hidden for now)
- NFT integrations tied to JAO perks
- Strategic partnerships with aligned meme projects

Phase 3: Expansion

- Launch official **JAO merch**
- Potential **mobile app or game integration**
- Community-driven events & contests
- Explore DAO-style voting
- Marketing expansion & cross-chain bridge possibilities
